# METAL IN ARCHITECTURE SINCE 1971

When Arch. Bruno Gonzato just returned from the USA he financed himself by producing and selling wrought iron scrolls and elements. The company grew in experience and size to become an international group with more than 15 branches and distributors in over 100 countries. This expansion has not affected the love for tradition that characterizes the ancient art of metalworking and actually Architect Gonzato considers himself more as a great craftsman than a businessman. This did not prevent him from running his own company under the banner of innovation and research, assisted by his wife Stefania, being also an architect and designer, his sons Francesca, Matteo, Davide, Dario and his son-in-law Andrea. This will to let the second generation grow in the managerial roles of the industry shows the foresight to lay a solid foundation for a future that guarantees the continuity of the company's philosophy. Today Gonzato Group is the reference company in the field of metal in the architecture. In addition to the wrought iron from which the Arteferro brand originates, also IAM Design, specialized in contemporary stainless steel and aluminum systems, is part of the group.

## 1989

**SPAIN** 

Ind.i.a. bases its first foreign business, Ind.ia España, in Madrid.

# arteferro

## 1998

**ACQUISITION OF A** COMPETITOR

The company purchases 67% of Croso, a German competitor on the market from 1711.

## 2001

ARTEFERRO INOX

The division of contemporary stainless steel, aluminum and glass systems is born.

## 1971

#### THE FOUNDATION

Ind.i.a. company was founded in Schio (Vicenza) as a general partnership, manufacturing semi-finished wrought iron components under the brand Arteferro

## 1990

**MOVING TO MALO** 

The company develops and moves its headquarters to Malo (Vicenza).

## 1996

**NEW OPENINGS** 

Ind.i.a. opens in Avellino Arteferro Sud and strengthens its corporate structure. It establishes Ind.i.a. France, based in Servian.

## 1999

### **NEW TRADING COMPANY**

Ind.i.a establishes a new trading company in the United States (Miami ), which covers the eastern part of the country and the Caribbean market. Quality certification ISO 9001 by the German agency TÜV.

## 2002

#### ARTEFERRO RUSSIA & CROAZIA

Establishment of Arteferro Russia, based in Moscow. Ind.i.a. acquires 55% of Dohomont Arteferro D.o.o. based in Gorican in Croatia.

## 2000

#### **NEW LOCATIONS**

Ind.i.a. founds Arteferro Scandinavien (based in Norrköping - Sweden) and Ind.i.a. Brasil (based in São Marcos - Brazil).

## 2003

#### **ACCREDITATION**

The company confirms its organizational capabilities gaining ISO 9001:2000 (VISION) accreditation.

1974

#### **MAIN SEAT**

The company establishes its seat at Monte di Malo (Vicenza).

1992

### **INDITAL HUSTON**

Texas), the first American trade company.

## 2004

#### **DOHOMONT - CROAZIA**

Ind.i.a. buys new properties and land adjacent to its headquarters. The corporate share in Dohomont Arteferro D.o.o. rises to 84%.

## 2005

## ENVIRONMENTAL PROTECTION

Ind.i.a. gains ISO 14001 accreditation for environmental protection. Opening of Arteferro Ukraine with headquarters in Kiev.

## 2006

#### THE SHARE RAISES

Arteferro Argentina and Arteferro Monterrey are established. Ind.i.a.'s share in Indital - Houston raises to 86% and that in Ind.i.a. - Brasil to 99%.

## 2007

## ENHANCING THE STAINLESS STEEL

The company enhances the stainless steel line by expanding the production line and the storage space and releases a new specific catalogue. The Dohomont branch in Croatia expands and builts a new warehouse. Ind.i.a. Qingdao in China is established.

## 2008

#### **AUTOMATION**

New branches are opened: Arteferro Poland, Arteferro Botnic and Arteferro Chile. A new fully automated warehouse of 6000 square meters at the headquarters of Ind.ia spa is built. Enlargement of the Russian warehouse of 2000 sqm.

## 2009

#### IL GRANDE FABBRO

Startup of Ind.i.a.'s new division dedicated to large projects and turnkey services: Il Grande Fabbro.

## 2011

### **SWEDEN**

Establishment of the Swedish subsidiary dedicated exclusively to stainless steel: Arteferro AB based in Partille.

## 2012

#### IAM DESIGN

The evolution of ARTEFERRO INOX leads to the creation of IAMdesign.

# 2013

## ACQUIRING A GERMAN COMPANY

The historic German company Triebenbacher is acquired.

## 2020

#### IAM+

Development of the special IAM+ line.

## 2021

#### **NEW BEGINNING**

A complete review of the architecture of our brands begins, with the aim of giving value to our common identity and make it even stronger.

## 2022

### **NEW BRANCHES**

Opening of two new subsidiaries: Gonzato Group U.S.A.-Los Angeles and Gonzato Group China in Shanghai

## 2023

#### **GO TO URBAN**

A new brand is born with elements dedicated to the design of public spaces and landscaped gardens

IAM Design is an Italian brand, leader in the design and the production of railing systems, stairs and canopies made in stainless steel, aluminum and glass. Every year the company produces elements to make more than 200.000 meters of railings.

Arteferro produces quality wrought iron elements with classic and elegant design, which lend themselves to the creation of valuable architectural details. More than 20 tons of semi-finished products are produced every year. This makes Arteferro the world's leading producer.

GoTo Urban specialises in creating innovative solutions such as bollards, planters, commercial signage, bicycle racks and more. It also stands out for the design of landscape garden systems, integrating modular elements in aluminium, steel or glass.

## A COMPANY LOOKING TOWARDS THE FUTURE.

Since 1971, the company is leader in the production and sale of ornamental components for the building industry and architecture. All products are the result of careful and passionate research by qualified experts that know the field better than anyone else. In fact, it is thanks to the Group's work if the production of metal elements for architecture and constructions has been able to grow in terms of technology and project management to become what it is now.

Gonzato Group brand meets needs of safety, support and decoration that have always distinguished the company.

In the Group's catalogues the clients can find more than 30.000 articles and components, thanks to the long experience, that involves all the production and supply chain from product design to manufacturing, to the installation support.

### **CUSTOMIZED PRODUCTS / CONTRACTS**

THE GONZATO GROUP MISSION IS TO MEET THE NEEDS OF DESIGNERS, CONTRACTORS AND PRIVATE PERSONS LOOKING FOR A SINGLE INTERLOCUTOR THAT CAN PROVIDE HIGH QUALITY METAL PRODUCTS AND AN HIGH LEVEL SERVICE.

Assisting the customer during all the process, from the first steps to the finished work, Gonzato Group is the ideal partner for any project and places itself towards the client like the sole responsible of the quality of its product and its service.

The widespread presence in the world markets of the head company Gonzato Group, facilitates the execution of any work in every part of the world. Gonzato Group addresses all of those that are looking for supplies for big jobs in wrought iron, stainless steel and any other metal that need a turnkey approach.

The final aim of Gonzato Group is to respond to all requests of planners, contractors and private citizens that do not have a valid counterpart able to offer the high-quality product and high level service of a multinational with a 50 years' experience in the sector. The company has the advantage of an experienced and creative technical office and a team of highly qualified cooperators able to develop any kind of job, whatever its size or complexity.

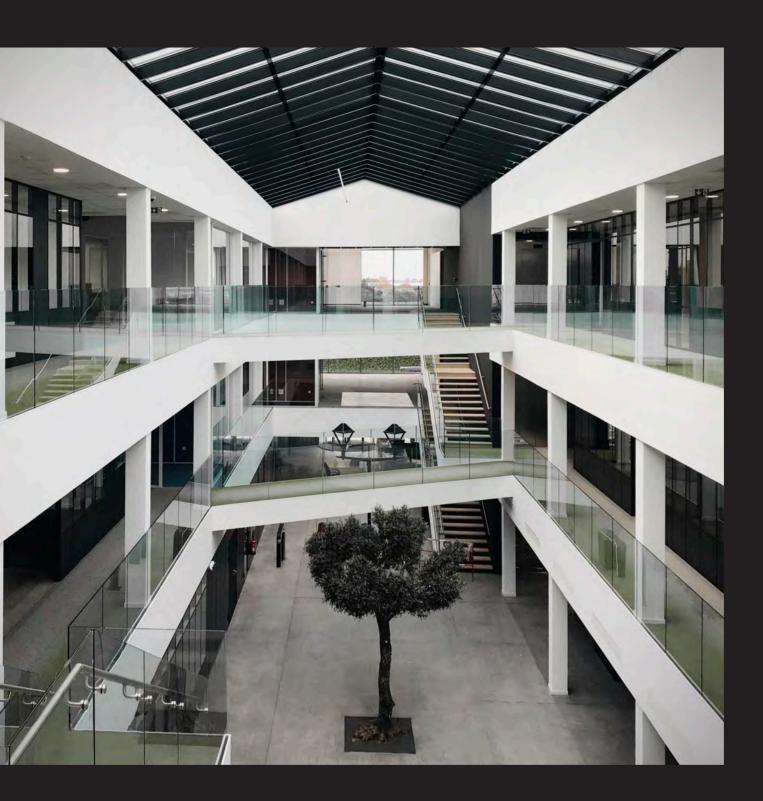

In this way, the company is always an integral part of the project, following the customer step by step from the beginning till the conclusion of the finished job, obtaining in this way the best possible final result.

### 03 > CONTE VISTARINO WINERY / WROUGHT IRON

## 04 > COLOSSEO / WROUGHT IRON

### 05 > CITYLIFE / STAINLESS STEEL

The Palace of Justice in Rome in Piazza Cavour was created without protective grilles for the 99 huge (h. 630 cm) windows on the ground floor. For safety reasons, it was decided to mount heat-drilled round iron grates with a diameter of 40 mm. The lances were hewn by hand and then forged, so each one is different from the others. Special side clamps ensure they are correctly fixed to the masonry.

The design of all the metal elements has been executed by the experts of Gonzato Contract, division of Ind.i.a. spa (Malo-Vicenza) dedicated to the big projects, while the production has been entrusted to the craftsmen of Arteferro, another division of the company dedicated to the production of ornamental semifinished articles.

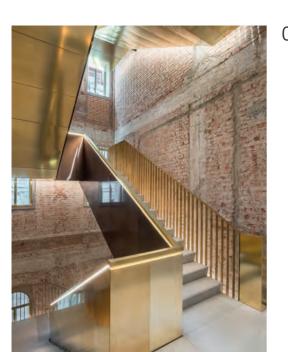

In these renovation works Gonzato Contract supplied and laid the entire structure of the staircase. Entirely made of iron, it stands out for its visual impressions, becoming an important aesthetic component and an interpreter of elegance and contemporaneity.

The 69 arches of the first order of the Colosseum have been properly protected with the gates of Gonzato Group, with full respect for the importance of this building, symbol of the great Roman era to the eyes of the world. 1,200 kg of iron was used for each of the large gates with a sophisticated system attaching the millennia-old travertine in order not to disturb its historical stratifications. This work of engineering craftsmanship meets new safety standards. Engines, emergency openings, special hinges, metallization and powder coating mean these objects will stand the test of time.

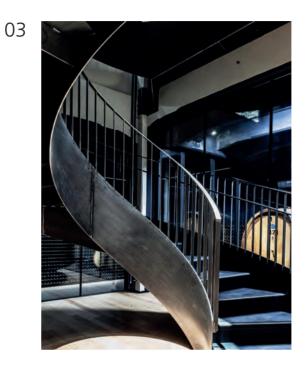

Gonzato Group played a central role in the CityLife project in Milan, supplying glass parapets for the terraces of the Libeskind Residences. These parapets, as well as improving the brightness of the flats, contribute to the unique and modern aesthetics of the buildings, integrating perfectly with the urban context. Gonzato Group thus confirms itself as an essential partner for the realisation of innovative and high quality architectural solutions.

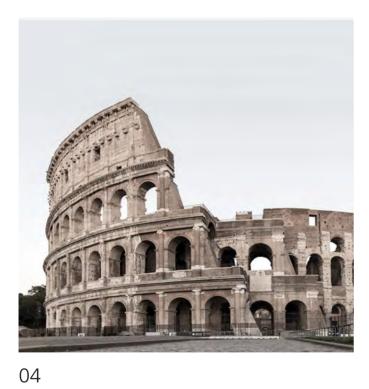

01

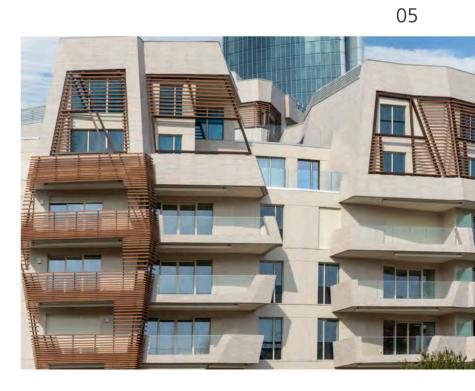

## **ARTEFERRO**

THE ART FORM REPRESENTED BY WROUGHT IRON IS FED BY TWO UNAVOIDABLE HUMAN NEEDS: PROTECTION AND BEAUTY. THAT IS WHY ARTEFERRO UNITES TRADITION WITH A CONSTANT SEARCH FOR TECHNICAL AND AESTHETIC INNOVATIONS.

Arteferro is the world leader in the production of items made of wrought iron, brass and bronze. The catalogue inlcudes over 30.000 elements: bars, forged pickets, preassembled panels, leaves, flowers, baskets, roses, scrolls, rings and other decorative elements, as well to a rich variety of home furnishings. It is the task of blacksmith to assemble them into finished objects such as balustrades, railings, fences, or any other creation suggests his creativity

### **ARTEFERRO SYSTEM**

Arteferro System is the line of products Arteferro characterized by an innovative style. The wrought iron classical motifs merge with the modern geometries and merge with them creating a special ensemble that tells past and future. The Liberty style lines of the early 1900 are harmonized through a contemporary aesthetic sense that rationalizes the space making it elegant and definite.

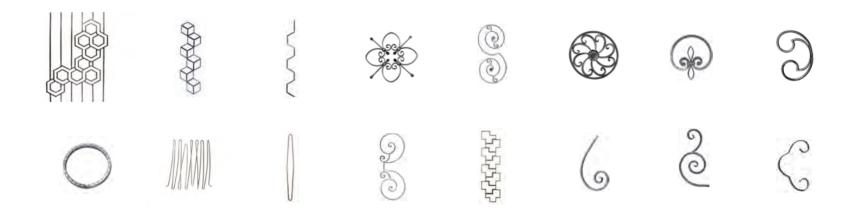

From the use of the latest technology to the choice of materials, everyone in the company contributes to the creation of innovative products that are the expression of a culture that Arteferro promotes and spreads worldwide. The company is able to do this by working closely with customers, employees and suppliers. Arteferro is also attentive to the community and the environment in which it operates, looking for continuous improvements through the control of the company's processes and comply with the laws that regulate each sector.

Thanks to all of this, the company can provide the client high-quality products and services guaranteeing a unique and controlled quality standard. At the same time, Arteferro takes care of the effects towards the environment, applying environmental sustainability policy.

## **ARTEFERRO**

## **COMPONENTS FOR EXPERT CRAFTSMEN**

## PROTECTION AND BEAUTY

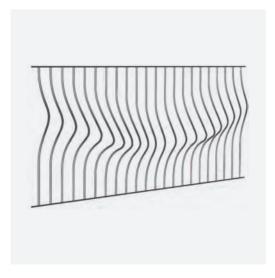

Protection and beauty characterize Arteferro's products, because we are convinced that every location can be a safe place, in compliance with the Italian aesthetics.

## WARRANTY

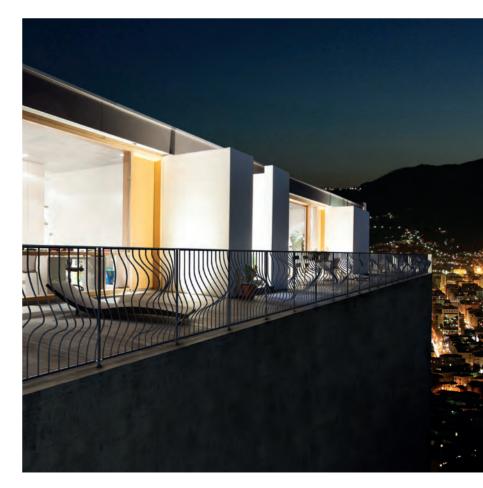

Together with our products we provide everything necessary for their installation, finishing and maintenance. Thanks to our production seats in Italy and Europe we can manage the entire production chain thus ensuring the best final quality and fast delivery to any country.

## ARTEFERRO SYSTEM FOR BUILDERS AND INSTALLERS

## **IAM DESIGN**

IAM DESIGN IS AN ITALIAN BRAND, LEADER IN THE DESIGN AND THE PRODUCTION OF RAILING SYSTEMS, STAIRS AND CANOPIES IN STAINLESS STEEL, ALUMINUM AND GLASS.

Every year the company produces elements for the realization of more than 200,000 meters of parapets. IAM Design's aim is to continue to develop its own design culture and production technology in order to be able to offer functionally innovative ideas which are exclusive from an aesthetic point of view and can ensure maximum reliability and safety over the time.

## **USER**

## **DISTRIBUTORE**

#### **URBAN FURNITURE**

Urban furniture elements are essential components in the design and organisation of public spaces that contribute both to improving the aesthetic appearance of outdoor areas and to ensuring functionality and safety in their use. Made of stainless steel or galvanised iron, GoTo Urban products stand out for their quality, design and versatility and are able to meet the most diverse needs, from protecting certain spaces, such as pavements or pedestrian areas, to creating parking areas for bicycles. The total recyclability of both steel and iron also makes these elements fully compatible with sustainable architecture concepts.

#### **LANDSCAPE GARDEN SYSTEMS**

'Terra' is GoTo Urban's garden containment and room partitioning system. The systems are composed of different modular elements, made of aluminium, stainless steel or glass, available in different shapes and types to allow flexible and versatile development of the desired outdoor project. Thanks to the different shapes, colours and materials, the 'Terra' system adapts to any context, making any project unique and customised. All with the quality that has always distinguished Gonzato Group products.

### TERRA: GARDENING LANDSCAPING SYSTEMS

This system is composed of different modular components that give the desired shape to the outdoor project. Straight, angled (both internal and external) elements and tensioners can be combined together in various ways, thus giving free rein to design imagination.

## **ROOM PARTITION SYSTEM**

This special room partitioning system, characterised by a simple and elegant design, adapts to any architectural style and is ideal for dividing outdoor spaces, delimiting the area and protecting them from the wind thanks to the glass wall. It is available in a version with storage for plants and flowers, in a version with a wooden seat (which can be combined to offer a versatile solution) and in an 'all-glass' version for maximum lightness.

## WINDSCREEN AND ENVIRONMENT PARTITIONS

GoTo Urban's protective windbreaks allow the best coverage of exposure and environmental partitioning requirements due to their versatility.

### **VALUES**

EACH PRODUCT IS THE RESULT OF A CAREFUL AND PASSIONATE STUDY BY PROFESSIONALS WHO KNOW THE INDUSTRY BETTER THAN ANYONE ELSE. SPECIALISED PERSONNEL CARRY OUT QUALITY BEFORE, DURING AND AFTER PRODUCTION.

#### **PEOPLE**

There are more than 500 employees. People are the heart of everything the company does. They are the greatest resource, helping Gonzato Group to stand out from the mass and become a clear choice for customers. Gonzato Group can only achieve its vision if all the colleagues, contractors and subcontractors feel committed to each other. The company has worked hard to make this a priority. Gonzato Group believes that intellectual capital is essential in order to provide innovative solutions and, ultimately, to have a positive economic impact. It is for this reason that the company invests in the continuous up-to-date training of its employees.

### **CERTIFICATIONS - QUALITY - ENVIRONMENTAL PROCUCT**

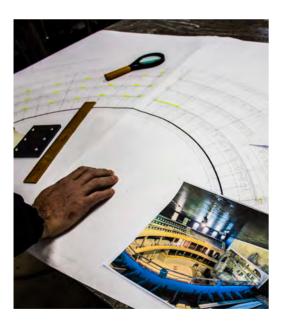

For us, thinking in terms of certification has become an established practice. Our efforts are characterised by a continuous search for quality and innovation, both in technical and procedural terms. In 1999, we obtained ISO 9001 Quality Certification. This certification aims to monitor the company's processes and the constant increase in quality of products and services offered to customers. In February 2006, our company obtained the certification for the stricter standard ISO 14001, dedicated to the environment. This achievement allows us to consider ourselves a leading company in environmental and social terms. We have also obtained the necessary product certifications for a wide range of products, confirming the high quality of our products, protecting the safety requirements of our customers in the different international markets.

#### LOW ENVIRONMENTAL IMPACT

Gonzato Group has always been committed to promote an intelligent use of our planet's resources. This is the reason why, in 2012, we have commissioned the installation, in its headquarters in Malo, of a solar plant that covers a surface of 3,5 sqm, with a rated power of 575 kW. The almost 2,400 photovoltaic modules that form the plant allow a remarkable self-production of electrical energy. From the environmental point of view this system of generating clean energy with zero impact, as generated from a renewable source such as the solar one, avoids the emission of pollutants from the production of electricity through the use of non-renewable sources (coal, oil, gas ...).

#### PRODUCTIONS AND RAW MATERIALS

With three production sites and thirteen companies able to intervene with small customizations in different countries, Gonzato Group manages step by step the entire production and supply chain, guaranteeing the highest level of quality at all stages. The production process is characterized by precision and high engineering capacity: simplicity and craftsmanship go hand in hand with technological innovation and attention to sustainability aspects. The high quality standards and the constant search for raw material of the best quality has allowed Gonzato Group to become the reference point on the international market. Since its foundation, Gonzato Group has always invested in innovative technologies to produce its items of relevant aesthetic level and technical performance. A permanent technical and design office develops every single product, looking to the future to meet the needs of its partners.

#### PRODUCT CULTURE AND INNOVATION

Gonzato Group bases its experience in the ancient art of metalworking, where it has introduced new technologies that have enabled the development of new design ideas. The themes of technological innovation, environmental sustainability and aesthetics are the founding elements of its research activities undertaken together with universities, and of the training events organized with architectural studios and retailers all over the world. Gonzato Group works with and for designers, leaving them free to realize their ideas. It is on the building site, in fact, that the project design and the product culture meet. From the synergy of this relationship, also derives a greater efficiency with consequent reduction of time and construction costs, with excellent results.

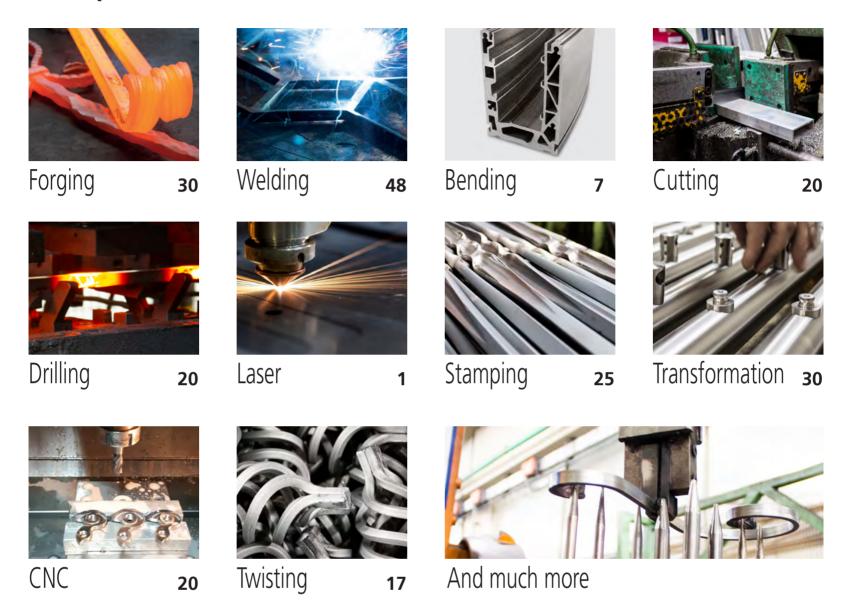

### **TECHNICAL SUPPORT**

The company supports the clients and users with training sessions held by qualified experts. A team of architects, engineers are at the disposal of the customers to provide them with products information and explanations on their uses and the applications.

#### **CUSTOMER FIRST**

The customers and their needs are always the focus of Gonzato Group attention. Therefore, a team of designers and engineers work daily to conceive new products that meet more and more the need of beauty in accordance with the present techniques. Gonzato Group is always searching to combine new products with different materials that satisfy new structural and aesthetical needs (wood, glass and so on). We design our products to be contemporary and easy to install. Gonzato Group products must be easy to assemble and integrate with the other architectural elements. The customers can access information about their orders through a b2b system or through the assistance of a prepared back-office.

## **OUR EQUIPMENT**

## **MADE IN ITALY**

We are proud of our products and for this reason our items are marked with a sticker that identifies us. Made in Italy for us is not simply a slogan: it is professionalism and care for our products.

## **GONZATO GROUP LABORATORY**

We, at the Gonzato Group, have created an area specifically dedicated to test the various systems in our factories to rigorously try out all production. Our products have always been designed and manufactured to offer the highest level of quality and safety because we want to be sure that they are suitable for the function they will perform. To verify compliance with specific functional and performance requirements, we carry out a combination of tests, measurements, checks and inspections in our Test Area. Our products are also qualitatively tested before, during and after production by experienced and specialized personnel. For the past 15 years we have been relying on several certification institutions that examine our products through various tests aimed at determining, in an objective way, their performance. The design and production quality of the Gonzato Group elements has allowed us to obtain certifications according to the regulations currently in force in many European countries and to guarantee the choice of our customers.

Our engineers are always up to date on the main European and international regulations

Static tests before and after break

These tests are performed according to strict safety standards, which define the requirements and static loads, concentrated and distributed, before and after breaking, of railings, balustrades and prefabricated parapets.

Dynamic tests

These tests are performed by impacting a moving body at a specific point on the railing system. The final purpose is to establish the level of safety even in case of sudden impacts.

Corrosion resistance

These tests are performed by putting our products in contact with chlorides and ferrous ions to determine resistance to aggressive agents in the given time frame.
